Problem Determine the plan to describe the way ECS will appear to it's users/operators and the way in which they will interact with the system.			
Proposed Solution The ECS Operations Plan provides a description of the way in which the system will appear to it's users/operators and the way in which they will interact with the system. It details how operational tasks will be performed on the system. It represents a consensus between development, support, and user groups on the conceptual operation of the overall system and serves as an information source during design, implementation, and testing of the system.
